Introduction

Diligent software engineer with three months of internship experience. Self-motivated with a passion for quality software. with some experience in building full-stack web applications. Confident in making a positive impact on software engineering teams. I am looking to start a career in software engineering and deliver excellent software development skills for enterprise-level software.

Work Experience

Intern Software Engineer @ Colus Sdn. Bhd   Cyberjaya, Malaysia
07/2023 – 10/2023

- Developing cross-platform desktop applications with Electron/Tauri using web technologies.
- Building user interfaces and server-rendered applications with Vue 3/Nuxt 3.
- Focusing on UI/UX design and development with DaisyUI (Tailwind CSS).
- Handling database-related tasks with SQLite.

Technical Skills

Languages: Java, JavaScript, C++

- **Tools:** Node.js, React.js, Next.js, Vue.js, Tailwind CSS, HTML/CSS, PostgreSQL, MongoDB, Git, and the CLI

Projects

Final Year Project
- The project aims to provide an easy-use platform for users submit tickets, creating profiles
- The project consists of users to submit tickets and admin to resolve the reports
- The technology used to develop the system is PHP, Java Script, HTML, CSS, Firebase authentication was performed and Cloud Firestore to Store the pictures and data.

Personal Website
- Built using Solid.js and Tailwind CSS on the main branch
- Multiple rewrites with different designs and technologies under other branches

Cyberjaya Online Rental System
- Built using Java on the main branch
- The system allows users to log in and access features like viewing profiles, booking, registering for new users, and viewing the hotels
- Administrators can log in to generate user accounts, add/delete user

You may check the rest of my projects on my GitHub account.
